MODESTA AWINO OTIENO

Full-Stack Software Developer

otienomodesta505@gmail.com | Kenya
github.com/modeotieno | linkedin.com/in/modesta-otieno-0551b4408 | dev.to/modeotieno

PROFESSIONAL PROFILE

Motivated Full-Stack Developer with hands-on experience building web and backend applications using Go, JavaScript, React and modern development tools. Currently developing software through practical, project-based training at Zone01 Kisumu, with working experience in frontend development, REST APIs, databases, Git, Linux and Docker. Focused on writing secure, reliable and user-friendly software that solves real-world problems, with a strong interest in backend systems and software engineering.

TECHNICAL SKILLS

Languages	Go, C, JavaScript, HTML, CSS, SQL
Frontend	React, Vite, React Router, Responsive Web Design
Backend	Go HTTP servers, REST APIs, HTML templates, Node.js
Databases	PostgreSQL, database integration, data operations
Tools & Platforms	Git, GitHub, Linux, Docker, npm, Flutter
Core Competencies	Authentication, role-based access control, audit logging, API integration, system analysis & design, problem solving

SELECTED PROJECTS

Smart Electoral Integrity System (SEIS)

React · Vite · Go · PostgreSQL · Docker · Git

- Developed a secure platform for transparent, verifiable digital election workflows.
- Designed authentication, role-based access control, audit logging and results-verification features.
- Integrated a Go backend with PostgreSQL and used Docker for development and deployment.

AXIS — Smart Irrigation & Water Management | Live demo

Go · REST API · Agricultural Data · Web Development

- Built a smart irrigation application to guide smallholder water-management decisions.
- Implemented crop water-use calculations using evapotranspiration, growth stages and irrigation efficiency.
- Deployed live for demonstration at axis-irrigation.fly.dev.

WAPI Project — Mobile Website | GitHub

Mobile Web · Frontend · Git · GitHub

- Developing the mobile website (frontend) for the WAPI project as part of the Flying Tea Squad team.
- Source code available at github.com/Flying-Tea-Squad/wapi-frontend.

EXPERIENCE

Software Development Apprentice — Zone01 Kisumu

- Build full applications through practical, project-based programming and peer collaboration.
- Develop web interfaces, HTTP servers, REST APIs and application logic using Go, C, JavaScript and React.
- Use Git and GitHub for version control, branching, commits, code reviews and shared repositories.
- Work in Linux-based environments and debug applications through systematic problem solving.
- Apply software engineering principles to real-world projects from design through deployment.

ICT Support & Data Operations — Huduma Kenya

- Provided technical support and troubleshooting for hardware and software issues.
- Diagnosed and resolved day-to-day ICT problems affecting users and computer systems.
- Assisted with network configuration, maintenance and peripheral/device management.
- Supported day-to-day ICT and data operations across the office.

EDUCATION

ICT — Rotary Vocational Training Centre

Practical training in information and communication technology, programming, computer systems and software development.

LANGUAGES & INTERESTS

Language: English
Interests: Full-stack and backend development, secure application development, APIs, database systems, algorithms, open source and encouraging more women in tech.
